

SCEPTER™

LOOPED-END WET MOP

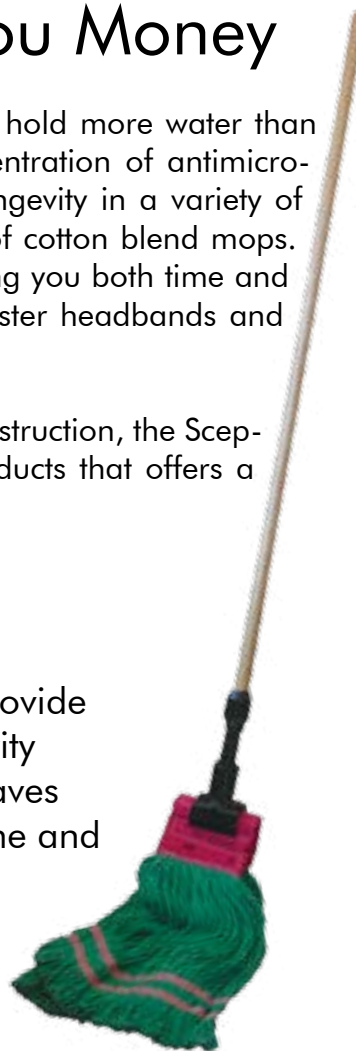

Energy-Efficient to Save You Money

The Scepter's synthetic blend is designed to pick up and hold more water than traditional blend mops. Manufactured with a high concentration of antimicrobial fiber to provide bacterial resistance and superior longevity in a variety of applications, the Scepter wet mop dries in half the time of cotton blend mops. This shortened drying time reduces processing costs, saving you both time and money. Scepter mops are made with 9" reinforced polyester headbands and double tailbands.

With its increased resistance to chemicals and detailed construction, the Scepter mop is one of the most durable, energy-efficient products that offers a great return on investment.

Features and Benefits

- Antimicrobial fibers in the blend yarn provide bacterial resistance and superior longevity
- 4-ply blend yarn reduces drying time, saves energy used in laundering as well as time and money
- Date coded to prove product life
- Fully launderable
