

TOUGH SCRUBBING ACTION

SCRUBBER PAD

HEALTHCARE

Microfibers are specially designed non-abrasive, non-linting fibers, small enough to penetrate into surface pores and remove tiny dust particles. Microfiber Mops save time and money by using a smaller amount of chemicals and water to clean than traditional mops. To use Microfiber Mop Pads, simply apply a clean pad, clean the area, and remove the pad to be laundered. The Velcro backing makes changing mop pads quick and easy, which helps eliminate concerns about cross-contamination from one area to another.

Features and Benefits

- Absorbent Microfiber provides a deep clean.
- Polypropylene Scrubber Strips are great for aggressive cleaning on grouted surfaces or any surfaces requiring scrubbing action.
- Ideal for restrooms.
- Made with Velcro backing, for quick easy changes.
- Works with Golden Star HD Aluminum Hardware & MIMA Microfiber Frames.
- Launderable.
